LOW PRESSURE PLASMA

FOR 3-DIMENSIONAL PRODUCTS

CLEANING | ACTIVATION | ETCHING | COATING

A **Low Pressure Vacuum Plasma** is a cutting-edge surface treatment system designed to remove contaminants, activate surfaces, and enhance adhesion through plasma technology. Operating in a controlled low-pressure vacuum environment, this system generates highly reactive plasma to modify the surface properties of various materials without damaging them.

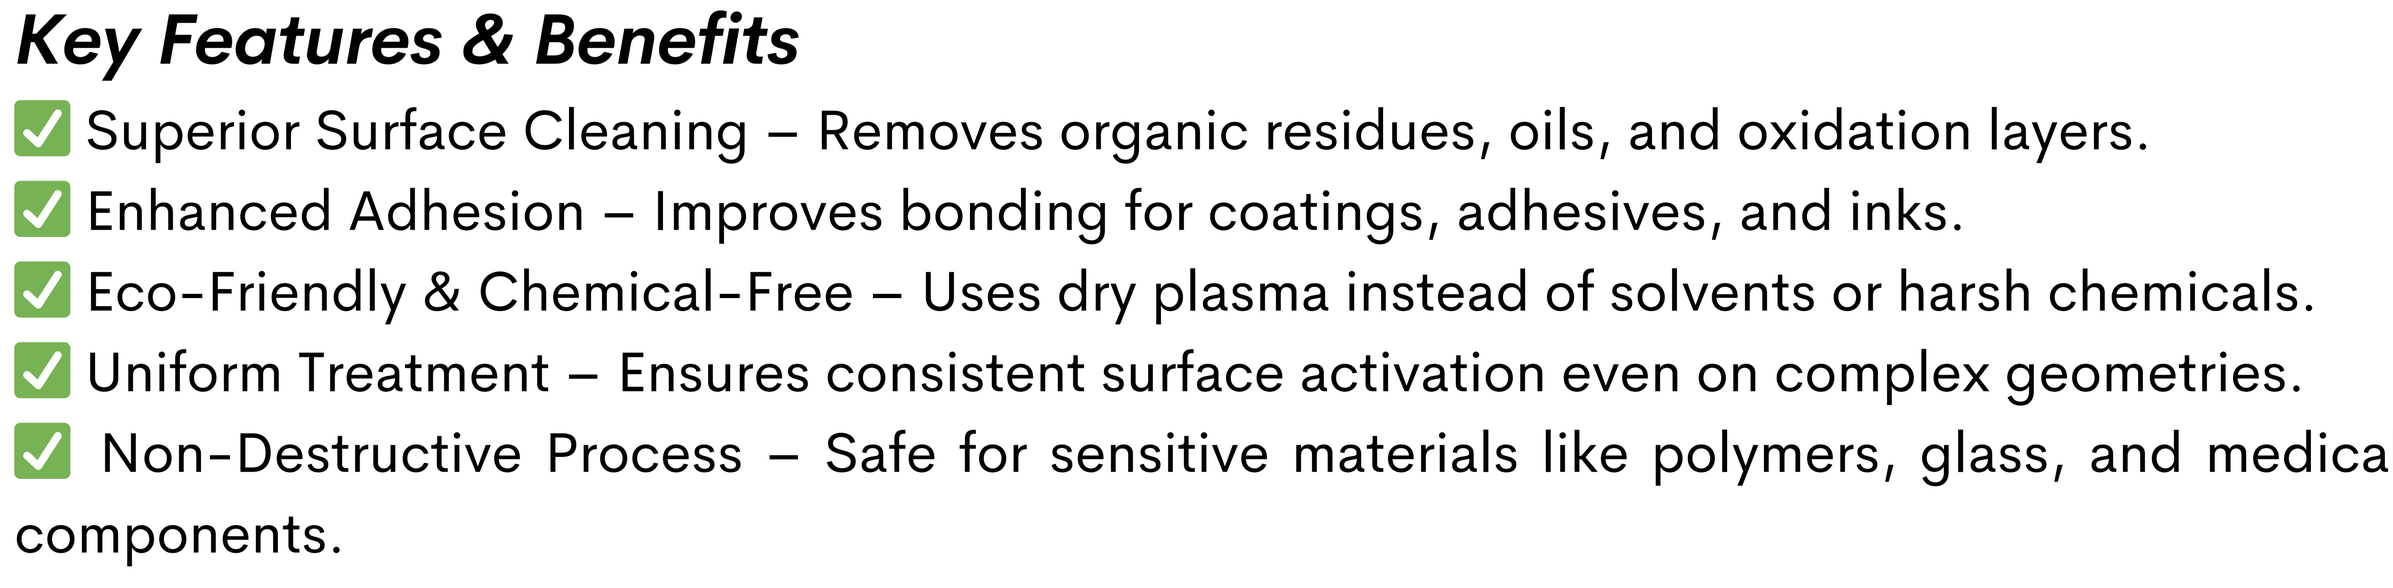

Key Features & Benefits

✅ Superior Surface Cleaning – Removes organic residues, oils, and oxidation layers.
✅ Enhanced Adhesion – Improves bonding for coatings, adhesives, and inks.
✅ Eco-Friendly & Chemical-Free – Uses dry plasma instead of solvents or harsh chemicals.
✅ Uniform Treatment – Ensures consistent surface activation even on complex geometries.
✅ Non-Destructive Process – Safe for sensitive materials like polymers, glass, and medical components.

RF Vacuum Plasma System **LF Vacuum Plasma System**
